Mr. M. Stern
President and C.E.O
C.En
3 Sonnhaldenstrasses
Zurich, CH-8032
SWITZERLAND

Dear Sir,

Re: C.En Technology and Development

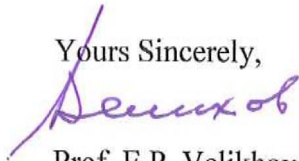

In reply to Prof. Eliezer's letter of May 15th 2009, I would to thank both Prof. Eliezer and yourself for the updated report which summarized C.En's past achievements, current status and future prospects for development. I found the report very interesting and I support C.En in its various achievements and developments, be they in the past or in their future prospects.

In my opinion the expert knowledge and insight of the various members of the Kurchatov Institute had allowed for the development of a firm theoretical base for C.En's technology. I believe that the combination of this knowledge with further experimentation at the BAM world leading facilities will lead to fruitful results. I believe that the fulfilment of the potential of this technology will resolve one of the central issues facing society today.

I have supported and continue to support the development of C.En's technology, and would be delighted to contribute to its development if needed.

Please do not hesitate to contact me when you feel necessary.

Yours Sincerely,

Prof. E.P. Velikhov
President
RRC Kurchatov Institute
